

# The Nobel Prize in Medicine and Sexual Health

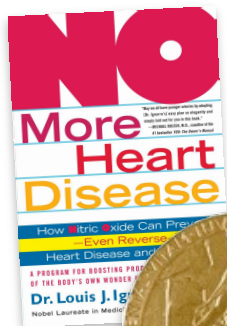

As important as the landmark discoveries of the X-Ray and Penicillin, today, the epic discovery of Nitric Oxide continues to profoundly impact the world in many ways. Understanding how Nitric Oxide functions in the human body can be very encouraging, especially for those interested in improving sexual health.

For men, erectile dysfunction is a very common condition. It can be an emotional and sensitive topic to discuss. For women, libido is also an important part of sexual health. We are happy to share the virtues of clinical research, evidence, and the proven benefits a product called ProArgi-9+ can offer to those hoping to improve this important aspect of their lives.

## The Beginning... The Nobel Prize in Medicine

In 1998, Dr. Louis J. Ignarro was awarded the prestigious Nobel Prize in Medicine "for his discovery concerning Nitric Oxide as a signaling molecule in the cardiovascular system".

"Nitric Oxide has been called the 'miracle molecule', and the 'spark of life' because of its extraordinary importance in the health of virtually every cell in the body" says Dr. Ignarro. This is also why Nitric Oxide was named "Molecule of the Year" in 1992 by the journal, Science.

Dr. Ignarro continues, "It is becoming more and more clear that Nitric Oxide is a molecule that may prevent and cure many diseases at once", including sexual dysfunction.

## Sexual Health, Nitric Oxide and Viagra

On the heels of this groundbreaking discovery, Viagra, a sexual enhancement drug, was released to the public. Viagra was the first drug ever to be released that utilizes the power of Nitric Oxide and showcased one major role this molecule can play in greatly improving the healthy function of the human body.

According to the Department of Urology, Johns Hopkins Medical Institutions, **Nitric oxide (NO) is believed to be the main vasoactive neurotransmitter and chemical mediator of penile erection.**

**Nitric oxide** supports the blood vessels and increases blood flow and therefore, supports the sexual system of the male human body. It has been shown that L-arginine may stimulate the production of **nitric oxide**, thus promoting male **sexual** function. Arginine may also provide a **support** for male fertility and boost **libido for both men and women**.

In layman terms, the presence of Nitric Oxide has been shown to aid erectile function while, "impaired Nitric Oxide bioactivity is a major pathogenic mechanism of erectile dysfunction".

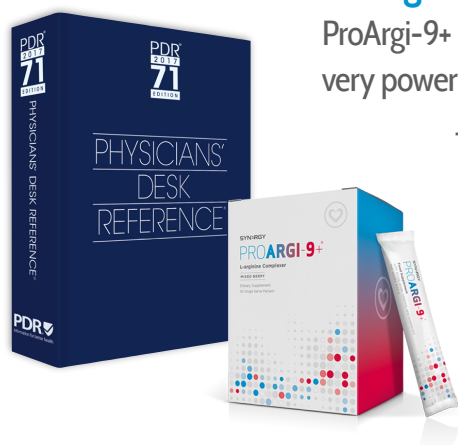

## L-Arginine

Although Dr. Ignarro's scientific discovery not only revealed the power of Nitric Oxide, it also revealed that L-Arginine, a humble amino acid, produces Nitric Oxide in the human body – and is the only known pre-cursor to Nitric Oxide in the human body. In short, Dr. Ignarro proved that increased Nitric Oxide production in the human body can be achieved by supplementing with L-Arginine!

## ProArgi-9+ and the Physician's Desk Reference

ProArgi-9+ is a powerful L-Arginine Complexer that has been shown to be a very powerful Nitric Oxide donor. This is its power.

This remarkable product has been listed in the Physicians Desk Reference as the “highest quality l-arginine supplement in the world”, since 2012.

## Synergy, a Worthy Partner

Synergy, and parent company, Nature's Sunshine, is known throughout the world for their superior pharmaceutical-grade manufacturing practices. Synergy's commitment to

deliver the highest possible quality in their finished product is evidenced as ProArgi-9+ undergoes 262 different quality tests throughout the manufacturing process alone.

We confidently join Synergy and their team of PhD's, MD's, microbiologists and biochemists and enthusiastically invite you to try ProArgi-9+.

## The First Human Clinical Trial

The Congestive Heart Failure Unit within the High Desert Heart Institute in Victorville, California, conducted a comprehensive human clinical trial using ProArgi-9+. This study revealed profound data that supported the efficacy and the profound health benefits ProArgi-9+ provides.

The study was fully funded, administered, and directed by the High Desert Heart Institute. Dr. Siva Arunasalam, the Administrator of the hospital and a quadruple board certified interventional cardiologist, claimed at the conclusion of the study utilizing ProArgi-9+, **“In twenty-two years, I have never seen anything like this. The results of this clinical study are remarkable and unexpected.”**
